Remote Sensing of Environment

An Interdisciplinary Journal

VOLUME 47, 1994

Contents

Emmett W. Chappelle and Hartmut Lichtenthaler
Preface 1

F. M. Méthy, A. Olioso, and L. Trabaud
Chlorophyll Fluorescence as a Tool for Management of Plant Resources 2

K. P. Günther, H.-G. Dahn, and W. Lüdeker
Remote Sensing Vegetation Status by Laser-Induced Fluorescence 10

Giovanna Cecchi, Piero Mazzinghi, Luca Pantani, Riccardo Valentini, Daniele Tirelli, and Paolo De Angelis
Remote Sensing of Chlorophyll *a* Fluorescence of Vegetation Canopies: 1. Near and Far Field Measurement Techniques 18

R. Valentini, G. Cecchi, P. Mazzinghi, G. Scarascia Mugnozza, G. Agati, M. Bazzani, P. De Angelis, F. Fusi, G. Matteucci, and V. Raimondi
Remote Sensing of Chlorophyll *a* Fluorescence of Vegetation Canopies: 2. Physiological Significance of Fluorescence Signal in Response to Environmental Stresses 29

J. E. McMurtrey III, E. W. Chappelle, M. S. Kim, J. J. Meisinger, and L. A. Corp
Distinguishing Nitrogen Fertilization Levels in Field Corn (*Zea mays* L.) with Actively Induced Fluorescence and Passive Reflectance Measurements 36

N. Subhash and C. N. Mohanan
Laser-Induced Red Chlorophyll Fluorescence Signatures as Nutrient Stress Indicator in Rice Plants 45

V. Krajicek and M. Vrbova
Laser-Induced Fluorescence Spectra of Plants 51

G. Bongi, A. Palliotti, P. Rocchi, I. Moya, and Y. Goulas
Spectral Characteristics and a Possible Topological Assignment of Blue Green Fluorescence Excited by UV Laser on Leaves of Unrelated Species 55

Fred Stober, Michael Lang, and Hartmut K. Lichtenthaler
Blue, Green, and Red Fluorescence Emission Signatures of Green, Etiolated, and White Leaves 65

Guido Schmuck and Ismael Moya
Time-Resolved Chlorophyll Fluorescence Spectra of Intact Leaves 72

Enamul Hoque and Goudo Remus
Native and Atrazine-Induced Fluorescence of Chloroplasts from Palisade and Spongy Parenchyma of Beech (*Fagus sylvatica* L.) Leaves 77

Contents continued

Judith A. Abbott, T. Austin Campbell, and David R. Massie
Delayed Light Emission and Fluorescence Responses of Plants to Chilling 87

V. I. Kharuk, V. N. Morgun, B. N. Rock, and D. L. Williams
Chlorophyll Fluorescence and Delayed Fluorescence as Potential Tools in Remote Sensing: A Reflection of Some Aspects of Problems in Comparative Analysis 98

Samuel N. Goward, Darrel L. Williams, and David L. Peterson
NASA Multisensor Aircraft Campaigns for the Study of Forest Ecosystems 107

W. A. Salas, J. K. Ranson, B. N. Rock, and K. T. Smith
Temporal and Spatial Variations in Dielectric Constant and Water Status of Dominant Forest Species from New England 109

John F. Weishampel, Guoqing Sun, K. Jon Ranson, Katherine D. LeJeune, and Herman H. Shugart
Forest Textural Properties from Simulated Microwave Backscatter: The Influence of Spatial Resolution 120

R. H. Lang, N. S. Chauhan, K. J. Ranson, and O. Kilic
Modeling P-Bank SAR Returns from a Red Pine Stand 132

Jon Ranson and Guoqing Sun
Northern Forest Classification Using Temporal Multifrequency and Multipolarimetric SAR Images 142

M. Moghaddam, S. Durden, and H. Zebker
Radar Measurement of Forested Areas during OTTER 154

J. A. Smith and S. M. Goltz
Updated Thermal Model Using Simplified Short-Wave Radiosity Calculations 167

B. N. Rock, D. L. Williams, D. M. Moss, G. N. Lauten, and M. Kim
High-Spectral Resolution Field and Laboratory Optical Reflectance Measurements of Red Spruce and Eastern Hemlock Needles and Branches 176

Samuel N. Goward, Karl F. Huemmrich, and Richard H. Waring
Visible-Near Infrared Spectral Reflectance of Landscape Components in Western Oregon 190

William T. Lawrence, Darrel L. Williams, K. Jon Ranson, James R. Irons, and Charles L. Walthall
Comparative Analysis of Data Acquired by Three Narrow-Band Airborne Spectroradiometers over Subboreal Vegetation 204

Lee F. Johnson, Christine A. Hlavka, and David L. Peterson
Multivariate Analysis of AVIRIS Data for Canopy Biochemical Estimation along the Oregon Transect 216

E. R. Levine, R. G. Knox, and W. T. Lawrence
Relationships between Soil Properties and Vegetation at the Northern Experimental Forest, Howland, Maine 231

D. W. Deering, E. M. Middleton, and T. F. Eck
Reflectance Anisotropy for a Spruce-Hemlock Forest Canopy 242

Abdelgadir A. Abuelgasim and Alan H. Strahler
Modeling Bidirectional Radiance Measurements Collected by the Advanced Solid-State Array Spectroradiometer (ASAS) over Oregon Transect Conifer Forests 261

K. Jon Ranson, James R. Irons, and Darrel L. Williams
Multispectral Bidirectional Reflectance of Northern Forest Canopies with the Advanced Solid-State Array Spectroradiometer (ASAS) 276

Sam Ekstrand
Assessment of Forest Damage with Landsat TM: Correction for Varying Forest Stand Characteristics 291

Fred M. Vukovich
Variations of the Gulf Stream's North Wall East of Cape Hatteras 303

Contents continued

William H. Farrand, Robert B. Singer, and Erzsébet Merényi
Retrieval of Apparent Surface Reflectance from AVIRIS Data: A Comparison of Empirical Line, Radiative Transfer, and Spectral Mixture Methods 311

Gerald C. Purgold, Charles H. Whitlock, Robert J. Wheeler, and Stewart R. LeCroy
A Multiwavelength Airborne Radiometer Scanner (ARS) for Measuring Surface Bidirectional Reflectance Characteristics 322

M. A. Goossens and S. B. Kroonenberg
Spectral Discrimination of Contact Metamorphic Zones and Its Potential for Mineral Exploration, Province of Salamanca, Spain 331

John W. Salisbury and Dana M. D'Aria
Emissivity of Terrestrial Materials in the 3–5 μm Atmospheric Window 345

R. W. Fitzgerald and B. G. Lees
Assessing the Classification Accuracy of Multisource Remote Sensing Data 362

Bo-Cai Gao and Alexander F. H. Goetz
Extraction of Dry Leaf Spectral Features from Reflectance Spectra of Green Vegetation 369

Timothy C. Gallaudet and James J. Simpson
An Empirical Orthogonal Function Analysis of Remotely Sensed Sea Surface Temperature Variability and Its Relation to Interior Oceanic Processes off Baja California 375

R. B. Myneni and G. Asrar
Atmospheric Effects and Spectral Vegetation Indices 390

Christoph C. Borel and Siegfried A. W. Gerstl
Nonlinear Spectral Mixing Models for Vegetative and Soil Surfaces 403

VOLUME 48, 1994

M. A. Friedl and F. W. Davis
Sources of Variation in Radiometric Surface Temperature over a Tallgrass Prairie 1

Claus Buschmann, Eckehard Nagel, Kálmán Szabó, and László Kocsányi
Spectrometer for Fast Measurements of *In Vivo* Reflectance, Absorptance, and Fluorescence in the Visible and Near-Infrared 18

A. Guissard, C. Baufays, and P. Sobieski
Fully and Nonfully Developed Sea Models for Microwave Remote Sensing Applications 25

P. Sobieski, A. Guissard, and C. Baufays
Comparison of Microwave Signatures for Fully and Nonfully Developed Sea Models 39

Peter J. Mouginis-Mark, Harold Garbeil, and Pierre Flament
Effects of Viewing Geometry on AVHRR Observations of Volcanic Thermal Anomalies 51

Stuart E. Marsh, James L. Walsh, and Claudia Sobrevila
Evaluation of Airborne Video Data for Land-Cover Classification Accuracy Assessment in an Isolated Brazilian Forest 61

Suzanne J. Sippel, Stephen K. Hamilton, John M. Melack, and Bhaskar J. Choudhury
Determination of Inundation Area in the Amazon River Floodplain Using the SMMR 37 GHz Polarization Difference 70

J. Cihlar, D. Manak, and N. Voisin
AVHRR Bidirectional Reflectance Effects and Compositing 77

J. L. Privette, R. B. Myneni, C. J. Tucker, and W. J. Emery
Invertibility of a 1-D Discrete Ordinates Canopy Reflectance Model 89

George R. Diak, Christopher J. Scheuer, Mark S. Whipple, and William L. Smith
Remote Sensing of Land-Surface Energy Balance Using Data from the High-Resolution Interferometer Sounder (HIS): A Simulation Study 106

Contents continued

J. Qi, A. Chehbouni, A. R. Huete, Y. H. Kerr, and S. Sorooshian
A Modified Soil Adjusted Vegetation Index 119

César Coll, Vicente Caselles, and Thomas J. Schmugge
Estimation of Land Surface Emissivity Differences in the Split-Window Channels of AVHRR 127

J. Peñuelas, J. A. Gamon, A. L. Fredeen, J. Merino, and C. B. Field
Reflectance Indices Associated with Physiological Changes in Nitrogen- and Water-Limited Sunflower Leaves 135

Xiao-Hai Yan, Quanan Zheng, Chung-Ru Ho, C.-K. Tai, and Robert E. Cheney
Development of the Pattern Recognition and the Spatial Integration Filtering Methods for Analyzing Satellite Altimeter Data 147

D.-S. Lin, E. F. Wood, P. A. Troch, M. Mancini, and T. J. Jackson
Comparisons of Remotely Sensed and Model-Simulated Soil Moisture over a Heterogeneous Watershed 159

Christian Mätzler
Microwave Transmissivity of a Forest Canopy: Experiments Made with a Beech 172

Robert J. Wheeler, Stuart R. LeCroy, Charles H. Whitlock, Gerald C. Purgold, and Jeffery S. Swanson
Surface Characteristics for the Alkili Flats and Dunes Regions at White Sands Missile Range, New Mexico 181

Xavier Pons and Lluís Solé-Sugrañes
A Simple Radiometric Correction Model to Improve Automatic Mapping of Vegetation from Multispectral Satellite Data 191

Kevin O. Pope, Jose M. Rey-Benayas, and Jack F. Paris
Radar Remote Sensing of Forest and Wetland Ecosystems in the Central American Tropics 205

Alberte Fischer
A Model for the Seasonal Variations of Vegetation Indices in Coarse Resolution Data and Its Inversion to Extract Crop Parameters 220

Eric F. Lambin and Alan H. Strahler
Change-Vector Analysis in Multitemporal Space: A Tool To Detect and Categorize Land-Cover Change Processes Using High Temporal-Resolution Satellite Data 231

S. F. Biggar, P. N. Slater, and D. I. Gellman
Uncertainties in the In-Flight Calibration of Sensors with Reference to Measured Ground Sites in the 0.4–1.1 μm Range 245

Frédéric Baret, Vern C. Vanderbilt, Michael D. Steven, and Stephane Jacquemoud
Use of Spectral Analogy To Evaluate Canopy Reflectance Sensitivity to Leaf Optical Properties 253

E. Ben-Dor and A. Banin
Visible and Near-Infrared (0.4–1.1 μm) Analysis of Arid and Semiarid Soils 261

J. C. Roger, R. Santer, M. Herman, and J. L. Deuzé
Polarization of the Solar Light Scattered by the Earth–Atmosphere System as Observed from the U.S. Shuttle 275

Elizabeth M. Nel, Carol A. Wessman, and Thomas T. Veblen
Digital and Visual Analysis of Thematic Mapper Imagery for Differentiating Old Growth from Younger Spruce-Fir Stands 291

C. François and C. Ottlé
Estimation of the Angular Variation of the Sea Surface Emissivity with the ATSR/ERS-1 Data 302

J. F. R. Gower
Red Tide Monitoring Using AVHRR HRPT Imagery from a Local Receiver 309

Tiit Nilson and Urmas Peterson
Age Dependence of Forest Reflectance: Analysis of Main Driving Factors 319

Contents continued

Joakim Malm and Lennart Jönsson
Water Surface Temperature Characteristics and Thermal Bar Evolution during Spring in Lake Ladoga 332

Jeffrey R. Key
The Area Coverage of Geophysical Fields as a Function of Sensor Field-of-View 339

J. Key, J. A. Maslanik, and E. Ellefsen
The Effects of Sensor Field-of-View on the Geometrical Characteristics of Sea Ice Leads and Implications for Large-Area Heat Flux Estimates 347

Short Communication

Scott K. Rowland, Gregory A. Smith, and Peter J. Mouginis-Mark
Preliminary ERS-1 Observations of Alaskan and Aleutian Volcanoes 358

VOLUME 49, 1994

David A. Hastings and Liping Di
Modeling of Global Change Phenomena with GIS Using the Global Change Data Base. I: Modeling with GIS 1

David A. Hastings and Liping Di
Modeling of Global Change Phenomena with GIS Using the Global Change Data Base. II: Prototype Synthesis of the AVHRR-Based Vegetation Index from Terrestrial Data 13

Yong Wang, Eric S. Kasischke, John M. Melack, Frank W. Davis, and Norman L. Christensen, Jr.
The Effects of Changes in Loblolly Pine Biomass and Soil Moisture on ERS-1 SAR Backscatter 25

Richard E. Rossi, Jennifer L. Dungan, and Louisa R. Beck
Kriging in the Shadows: Geostatistical Interpolation for Remote Sensing 32

Lawrence W. Harding, Jr., Eric C. Itsweire, and Wayne E. Esaias
Estimates of Phytoplankton Biomass in the Chesapeake Bay from Aircraft Remote Sensing of Chlorophyll Concentrations, 1989–92 41

Gregory J. McDermid and Steven E. Franklin
Spectral, Spatial, and Geomorphometric Variables for the Remote Sensing of Slope Processes 57

Per Syrén
Reflectance Anisotropy for Nadir Observations of Coniferous Forest Canopies 72

Barbara J. Yoder and Richard H. Waring
The Normalized Difference Vegetation Index of Small Douglas-Fir Canopies with Varying Chlorophyll Concentrations 81

Danielle J. Marceau, Philip J. Howarth, and Denis J. Gratton
Remote Sensing and the Measurement of Geographical Entities in a Forested Environment. 1. The Scale and Spatial Aggregation Problem 93

Danielle J. Marceau, Denis J. Gratton, Richard A. Fournier, and Jean-Pierre Fortin
Remote Sensing and the Measurement of Geographical Entities in a Forested Environment. 2. The Optimal Spatial Resolution 105

Peter Meyer
A Parametric Approach for the Geocoding of Airborne Visible / Infrared Imaging Spectrometer (AVIRIS) Data in Rugged Terrain 118

Eric Rignot and Jo Bea Way
Monitoring Freeze-Thaw Cycles along North-South Alaskan Transects Using ERS-1 SAR 131

Crystal Barker Schaaf and Alan H. Strahler
Validation of Bidirectional and Hemispherical Reflectances from a Geometric-Optical Model Using ASAS Imagery and Pyranometer Measurements of a Spruce Forest 138

Contents continued

Eric Rignot, Jo Bea Way, Kyle McDonald, Leslie Viereck, Cynthia Williams, Phyllis Adams, Cheryl Payne, William Wood, and Jiancheng Shi
Monitoring of Environmental Conditions in Taiga Forests Using ERS-1 SAR 145

P. Puyou-Lascassies, G. Flouzat, M. Gay, and C. Vignolles
Validation of the Use of Multiple Linear Regression as a Tool for Unmixing Coarse Spatial Resolution Images 155

Paul J. Pinter, Jr., and M. Susan Moran
Foreword: Remote Sensing of Soils and Vegetation 167

Gerard Guyot and Xing-Fa Gu
Effect of Radiometric Corrections on NDVI-Determined from SPOT-HRV and Landsat-TM Data 169

John C. Price
How Unique Are Spectral Signatures? 181

Christopher M. U. Neale and Blake G. Crowther
An Airborne Multispectral Video/Radiometer Remote Sensing System: Development and Calibration 187

A. B. Frank and J. K. Aase
Residue Effects on Radiometric Reflectance Measurements of Northern Great Plains Rangelands 195

R. B. Myneni and D. L. Williams
On the Relationship between FAPAR and NDVI 200

C. L. Wiegand, J. D. Rhoades, D. E. Escobar, and J. H. Everitt
Photographic and Videographic Observations for Determining and Mapping the Response of Cotton to Soil Salinity 212

A. Huete, C. Justice, and H. Liu
Development of Vegetation and Soil Indices for MODIS-EOS 224

D. C. Reicosky, P. W. Brown, and M. S. Moran
Diurnal Trends in Wheat Canopy Temperature, Photosynthesis, and Evapotranspiration 235

M. S. Moran, T. R. Clarke, Y. Inoue, and A. Vidal
Estimating Crop Water Deficit Using the Relation between Surface–Air Temperature and Spectral Vegetation Index 246

Bhaskar J. Choudhury
Synergism of Multispectral Satellite Observations for Estimating Regional Land Surface Evaporation 264

W. P. Kustas, E. M. Perry, P. C. Doraiswamy, and M. S. Moran
Using Satellite Remote Sensing to Extrapolate Evapotranspiration Estimates in Time and Space over a Semiarid Rangeland Basin 275

Bernard Seguin, Dominique Courault, and Martine Guérif
Surface Temperature and Evapotranspiration: Application of Local Scale Methods to Regional Scales Using Satellite Data 287

Alain Vidal, Florence Pinglo, Hélène Durand, Claire Devaux-Ros, and Albert Maillet
Evaluation of a Temporal Fire Risk Index in Mediterranean Forests from NOAA Thermal IR 296

R. Pearson, J. Grace, and G. May
Real-Time Airborne Agricultural Monitoring 304
